These luminaries consist of an 18-inch prismatic globe, a high-pressure sodium ballast and a mounting base. They are used with the concrete streetlight standards, and are similar to those in place at Hutchins Street Square.

Fifteen of these globes will be used by the Public Works Department for installation along the Central Avenue GrapeLine route between Oak and Hilborn Streets. (Original plans called for twelve lights to be installed, but favorable pricing now allows for the installation of three additional lights). The balance of the order will be used for replacement of older damaged or defective globe-style lights in the street-lighting system.
