

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Traffic Resolution Amendment - Vine Street at Sacramento Street and Grant Avenue at Louie Avenue, intersection Control

MEETING DATE: July 1, 1992

PREPARED BY: Public Works Director

RECOMMENDED ACTION: That the City Council adopt a resolution amending the Traffic Resolution #87-163 to approve the installation of "stop" signs on Vine Street at Sacramento Street and the conversion of "yield" signs to "stop" signs on Grant Avenue at Louie Avenue as shown on the attached map.

BACKGROUND INFORMATION: The intersection of Vine Street at Sacramento Street and Grant Avenue at Louie Avenue have been studied due to their accident rates. The accident rate at Vine Street and Sacramento Street ranked highest on our study list of uncontrolled intersections. The intersection of Grant Avenue and Louie Avenue ranked in the top four of intersections controlled by "yield" signs.

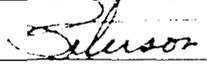

Available accidents records over a three-year period indicate that there has been one accident correctable with the installation of a right-of-way control at the intersection of Vine Street and Sacramento Street. At the intersection of Grant Avenue at Louie Avenue, there has been three accidents correctable with the installation of stop signs.

Based on the department's intersection control guidelines, the minimum control on Vine Street at Sacramento Street would be a "yield" control. However, due to the low approach speeds required in order for drivers on Vine Street to see approaching vehicles on Sacramento Street, a "stop" control is recommended. A "stop" control is also recommended in place of the existing "yield" control on Grant Avenue at Louie Avenue due to the low traffic volumes and disproportionately high number of accidents. Multi-way stop controls are not justified at either of these locations.

FUNDING: Funding to be provided by the Street Maintenance Account.
