July 5, 1990

ALICE H. BEMONE  
CITY CLERK  
CITY OF LODI

795 Folsom Street  
San Francisco, California 94107  
(415) 442-2600

**NOTICE OF VOICE GRADE PRIVATE LINE  
AND FOREIGN EXCHANGE SERVICE RATE RESTRUCTURE:**

AT&T has filed an application with the California Public Utilities Commission to unbundle its Voice Grade Private Line (Series 1000, 2000 & 3000 Channel Services) and Foreign Exchange services between the local access segment (Local Channel) and AT&T's network services segment, (Interoffice Channel).

Generally, the rate for the Local Channel will increase while the Interoffice Channel price will decrease. The overall impact on an individual customer bill will depend upon the customer's particular circuit configuration.

A copy of AT&T's application and related exhibits will be furnished upon written request to:

Mr. Charles R. Miller  
ATCT Communications of California Inc  
795 Folsom Street  
Room 220  
San Francisco, CA 94107

AT&T NOTICE OF APPLICATION FOR  
ADDITIONAL REGULATORY FLEXIBILITY

RECEIVED

JUL 18 PM 2:08

In order to respond more effectively to the needs of our customers and to the demands of the competitive marketplace, AT&T Communications of California, Inc. (AT&T) has filed an application with the California Public Utilities Commission ("Commission") asking for the authority to change prices and introduce new services on the same basis as its competitors.

Through a series of price decreases, AT&T has exhausted the initial pricing flexibility granted by the Commission in December, 1988. AT&T is now seeking the same regulatory flexibility that its competitors enjoy regarding price changes and new service offerings. AT&T's competitors are currently allowed to change prices, up or down, and introduce new services through the advice letter process on five days' notice.

AT&T proposes to price all services above Long Run Incremental Cost and to maintain virtually all of the commitments to the interLATA marketplace included in the Commission's initial pricing flexibility order (D.88-12-091). AT&T also proposes in its application that the Commission continue the comprehensive monitoring plan established in D.88-12-091.

If the Commission adopts AT&T's proposal, there will be no immediate effect on your AT&T bill since there is no automatic increase or decrease in AT&T's intrastate prices associated with this application. Rather, AT&T is requesting authority to adjust prices and introduce new services using the same procedures as its competitors.

The Commission staff will review AT&T's application and may propose changes to the request AT&T has made. The Commission staff consists of engineers, accountants, economists and attorneys who will evaluate this proposal and present their analyses and recommendations to the Commission. Other interested parties may also make recommendations. Although a variety of proposals may be submitted, the final determination will be made by the Commission.

A copy of the application may be examined at the offices of the California Public Utilities Commission, State Building, 505 Van Ness Avenue, San Francisco, CA 94102 or State Building, 107 South Broadway, Los Angeles, CA 90012; or at AT&T Headquarters at 795 Folsom Street, San Francisco, CA 94107.

A copy of the application will be furnished upon written request to C. R. Miller, AT&T, 795 Folsom Street, Room 220, San Francisco, CA 94107.
