Mr. Don Soares

Subject: East Century Boulevard Speed Limit and ~~Truck~~ Restrictions

The Public Works Department is responding to your concerns raised at the December 16, 1992 City Council Meeting under the comments by the public on non-agenda items portion of the meeting. City staff reviewed these items based on an earlier inquiry.

We have scheduled a speed limit study shortly after the completion of the Century Boulevard extension to Stockton Street now underway in conjunction with the Bangs Ranch Project. In order to be radar enforceable, these studies must include measurement of prevailing speeds, accident rates and other factors in accordance with State law. They take a fair amount of staff time and any work done now would be quickly invalidated with the completion of the Bangs Ranch Project since conditions will have changed. We estimate we will be able to take the establishment of a speed limit to the City Council in the summer of 1993. We will make sure you are notified of this meeting and receive a copy of the staff report we send to the City Council.

With regard to ~~the truck~~ restrictions, we are working on a City-wide report on ~~truck~~ related problems which we hope to take to the City Council in February or March 1993. We will include your concerns in this study and will send you a copy of this report when it is available.

In the meantime, if you have any questions or comments, please contact Paula Fernandez or Rick Kiru in our Traffic Engineering Division at 333-6706. Thank you for expressing your interest in traffic safety.

Jack L. Ronsko
