RE: Bids for Lighting Salas Park
DATE: January 18, 1982

Even though the Birdsong bid seems higher than the others, because of the design of their product it is in essence the cheaper in the long run for the following reasons:

1. Assembly -- The Birdsong unit comes all assembled and ready to install, while with the others it is necessary to put everything together. In order to do so you must purchase many items, the major of which are:
 - a. Panels for each pole
 - b. Crossarms
 - c. Fuses
 - d. Wire

Of course, you must also have the labor to assemble the above versus the preassembled Birdsong product.

2. Installation -- With the Birdsong, when the unit is hung on the pole, everything is concealed in a metal crossarm, making for a neat installation and with all wires protected, which also gives a more esthetic installation.

It might also be pointed out that because of the Birdsong design, since it is pre-aimed, it will save on labor. Birdsong gives a 5-year guarantee on aiming and light adjusting as well, along with a 2-year guarantee on all products.

Consequently, along with the figures submitted by the Utility Dept., we wholeheartedly recommend that Birdsong be given the bid as submitted.
