Mr. James F. Culbertson  
President  
San Joaquin Local Health District  
641 North Pacific Avenue  
Lodi, CA 95240

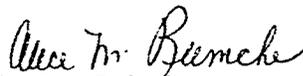

Dear Jim:

On behalf of the Lodi City Council, may I extend our sincere appreciation to you and Dr. Khanna for your presentation at the last Council meeting regarding the State of the District and its goals. It was a most informative report.

Also we would like to thank you for your kind invitation to your open house.

I would like to take this means of commending you for your ongoing commitment of time and energy in serving your community on this most important board.

Very truly yours,

  
Alice M. Reimche  
City Clerk

## LODI HEALTH CENTER CLINIC SERVICES

The Lodi Health Center Clinic is the busiest clinic of the outlying area clinics. Clinic service hours were increased by 8 hours for a yearly total of 604 hours. Through the use of the Mobile Health Clinic, another clinic site is offered on the east side of Lodi at Heritage School. Special measles clinics have also been held at school sites.

Services offered at the Lodi Health Center Clinic include: Well child screening physicals, CHDP physicals, adult screening physicals, hearing and vision screenings, travel immunizations, senior flu, and pneumonia immunizations, immunizations for children and adults, PPD's, premarital blood draws, and annual rabies clinics.

In 1986 1,182 physical exams were conducted at the Lodi Health Center. A total of 21,683 immunizations were given. Four hundred and ninety-nine canine rabies vaccinations were given and a total of 1,354 miscellaneous service units were rendered. Total unduplicated patient count for Jan-Dec 1986 was 8,239.

CLINIC SCHEDULES-SAN JOAQUIN LOCAL HEALTH DISTRICT

ALL CLINICS ARE BY APPOINTMENT, WITH THE EXCEPTION OF SEXUALLY TRANSMITTED DISEASE AND IMMUNIZATION CLINIC /

STOCKTON HEALTH CENTER-1601 EAST HAZELTON AVENUE., TELEPHONE: 466-6781

SAN JOAQUIN  
LOCAL HEALTH DISTRICT  
SERVICES

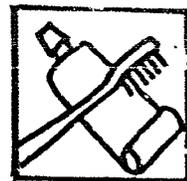

**ADOLESCENT FAMILY LIFE PROGRAM**

- Case management for pregnant and parenting teens
- Assessment and referral to community resources
- Ages 17 and under are eligible
- Call 468-3480

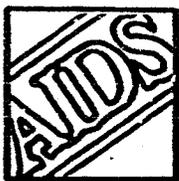

**BIRTH DEFECTS MONITORING PROGRAM**

- State program to monitor and investigate birth defects
- Population based registry of children with structural congenital anomalies
- Data base available to scientists or physicians for research purposes

**DENTAL DISEASE PREVENTION PROGRAM**

- Teaches oral hygiene, nutrition, safety
- Provides floss, toothbrushes and fluoride mouthrinse
- Any K-6 class is eligible
- Call 468-3491

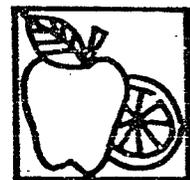

**AIDS EDUCATION**

- Speaker presentations and in-service trainings
- Written and audio-visual resource materials
- Consultation, counseling and referrals
- Call 468-3495

**CALIFORNIA CHILDREN SERVICES-MEDICAL THERAPY PROGRAM**

- Physical and occupational therapy provided in a school setting
- Children with neuromuscular and related problems are usually eligible
- Birth to 21 years
- Call 944-4593

**ENVIRONMENTAL HEALTH SERVICES**

- Activities include inspection, monitoring and surveillance
- Programs include rabies control, food, water, toxics, sewage, land use and vector control

**AIR POLLUTION CONTROL**

- Grant or deny permits to air pollution sources
- Monitoring and surveillance of air pollution sources
- Air quality management planning
- Agricultural burn permits
- Promulgation of new rules/laws

**CHILD HEALTH DISABILITY PREVENTION PROGRAM**

- Assists the San Joaquin County Maternal, Child, Adolescent Health Board
- Outreach, case management, and referrals for Medi-Cal and other eligible youth, age 0 to 21 years
- Assists and audits medical CHDP providers

**EPIDEMIOLOGICAL AND COMMUNICABLE DISEASE SERVICES**

- Community and school education consultation
- Health education and promotion
- Staff development and education
- Educational materials

### HEALTH EDUCATION SERVICES

- Community and school education consultation
- Health education and promotion
- Staff development and education
- Educational materials

### HOME HEALTH SERVICES

- Skilled nursing care
- Aide care
- For qualified home-bound

### IMMUNIZATION SERVICES

- Routine immunization for children
- Travelers' immunizations
- Monitoring and consultation to schools
- Patient record information
- Annual influenza and pneumonia vaccine clinics
- Hepatitis B vaccination for at-risk professionals

### MEDICAL EXAMINATION SERVICES

- Routine adult physicals
- Premarital exams
- Sports physicals
- Mobile health clinics
- Well child clinics

### PERINATAL SERVICES

- Liaison between physicians and State
- Technical assistance to providers in subsidized programs
- Public information and education
- PHN visits on referral to high risk populations

### PUBLIC HEALTH LABORATORY

- Laboratory analysis and epidemiologic studies
- Environmental testing
- Consultation and reference services

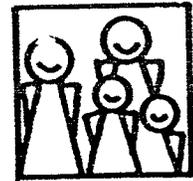

### PUBLIC HEALTH NURSING

- Home visits by referral to high risk populations
- Child growth and development, nutrition, family planning and communicable disease control services/education
- School health medical and nursing consultation
- SIDS follow-up
- High risk infant follow-up
- Older adult services at selected sites

### SEXUALLY TRANSMITTED DISEASE CLINIC

- Diagnosis and treatment
- Follow-up of contacts
- HIV (AIDS) antibody test

### SOUTHEAST ASIAN REFUGEE HEALTH SERVICES

- PHN assessment and referral with interpreters
- Communicable disease services
- Maternal and child health services
- Tuberculosis control services

### TUBERCULOSIS SERVICES

- Skin tests and X-rays
- Medical treatment at Bret Harte clinic
- Home follow-up
- Intermittent therapy

### VITAL STATISTICS

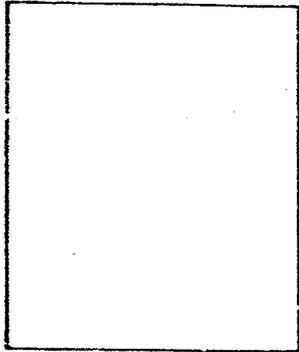

- Vital statistics and communicable disease data
- Registration of births and deaths
- Certified copies of birth and death certificates

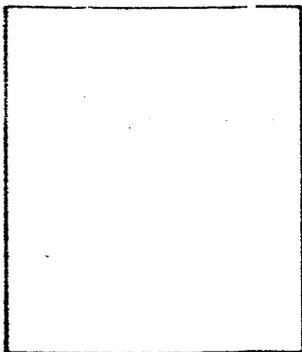

### WOMEN, INFANT AND CHILDREN (WIC)

- Vouchers for supplemental foods
- Nutrition education and counseling
- Pregnant and breast-feeding women, infants, and children up to age 5 are eligible

The Board of Trustees serves as the governing body for the San Joaquin Local Health District. They oversee the Health District in its mission to protect and promote the health of all county residents. Six trustees are selected by city governments and three others are chosen by the San Joaquin County Board of Supervisors.

- Some Health District services are provided free of charge. Other service charges are based on income and family size.
- Most clinics can arrange translation services in Spanish, Tagalog, Vietnamese, Cambodian, Laotian, etc.
- Appointments are necessary for some clinics and services.

**AREA OFFICES**

Stockton	1601 E. Hazelton Avenue	466-6781	Mon. - Fri., 8 to 11:30 a.m., 1 to 4 p.m.
Lodi	300 W. Oak Street	369-3621	Thursday, 1:00 to 4:30 p.m.
Manteca	124 Sycamore Street	823-7104	Wednesday, 1:00 to 4:30 p.m.
Tracy	205 W. 9th Street	835-6385	Tuesday, 1:00 to 4:30 p.m.

Residents of Escalon and Ripon should call the Manteca office for information. A mobile van provides some services to all cities in San Joaquin County, including Linden and Thornton. Call the Stockton office for more information.

SAN JOAQUIN LOCAL HEALTH DISTRICT  
1601 E. Hazelton Avenue - P.O. Box 2009 - Stockton, CA 95201

PUBLIC HEALTH MISSION

Mission of Public Health is to protect, preserve and promote the health of the community, irrespective of age, sex, race, ethnicity, or income in San Joaquin County.

PUBLIC HEALTH GOAL

Protect, preserve and promote health of all San Joaquin county residents by:

1. Prevention of preventable diseases;
2. Prevention of premature death, deformity and disability;
3. Promotion of optimal physical emotional and social wellbeing.

## ONGOING FUNCTIONS & RESPONSIBILITIES OF PUBLIC HEALTH

1. Provide educational activities to establish or modify knowledge, attitudes or behaviors e.g. health education, health promotion, patient education (hypertension, breast self-examination, PAP smear, prenatal education, safety education, dental education), health risk reduction education, senior health promotion, injury prevention for seniors, infant car seat and seat belt use education, health effects of toxics and air pollutants in the air.
2. Provide programs with preventive actions, immunization, WIC vouchers (for pregnant women, infants, preschool and headstart children). Dental education for K-6 plaque control, fluoride mouth rinse, nutrition education, TB prophylaxis.
3. Early detection of health problems, eg high blood pressure screening, TB skin testing, child health screening clinics, senior's health, sexually transmitted disease clinic, HTLV III antibody testing and counseling program (with counseling and referral for definitive diagnosis).
4. Other services include Public Health Laboratory Services, Vital Statistics, general Public Health Nursing field services, Home Health Agency, Environmental Health Services in the areas general sanitation, restaurant inspections, housing program.

CONTROLLABLE RISK FACTORS

# PUBLIC HEALTH *Update*

District Health Officer Jogi Khanna, MD, MPH

SAN JOAQUIN LOCAL HEALTH DISTRICT

December 1986

## *From the Desk of Your Health Officer*

### PROTECTING THE PUBLIC'S HEALTH IS OUR BUSINESS

The purpose of public health is to protect, preserve, and promote the health of the community, irrespective of age, sex, race, ethnicity, or income. The goals of public health programs at the San Joaquin Local Health District are to prevent premature disease and disability, and to promote optimal physical, emotional and social well being. The services of the Health District are: public health nursing, communicable disease control, immunizations, child health screening, public health laboratory, birth defects monitoring, health education, environmental health, and air pollution control. These are all designed to protect the health and well being of our broad constituency, from infancy to old age.

Communicable Disease Control is one of the major responsibilities of public health. An epidemiological approach is used to identify, quantify, and apply control measures to prevent the spread of communicable diseases. Tuberculosis, hepatitis, meningitis, sexually-transmitted diseases, AIDS, and other reportable diseases are monitored by this program. Diagnosis, treatment, referral and follow-up for sexually-transmitted disease are available, along with confidential AIDS antibody testing and counseling. Your cooperation in reporting these illnesses helps the Health District to accurately assess disease activity in the community.

Addressing Maternal and Child Health needs is another major component of preserving the public's health. The Health District offers child health and disability prevention services, adolescent and family life case management, perinatal health, dental health education, and nutrition education and food voucher distribution through the Women, Infants and Children (WIC) program. Disabled children can receive medical therapy from the California Children's Services (CCS) program.

Public Health Nursing supports all of the above-mentioned services, as well as other medical and health education programs with home and community site visits. Health promotion, counseling, case finding, and monitoring.

with emphasis on high risk mothers and infants, are provided. Special outreach and education programs address the needs of senior citizens and Southeast Asian refugees. Translation into Spanish, Laotian, Hmong, Vietnamese, and Cambodian is available for services at the Health District.

The Health District's Public Health Laboratory provides extensive laboratory services for diagnosis and epidemiological investigations. Consultation, references, and referrals to other labs and medical services are also available.

The Division of Environmental Health is responsible for protecting health and safety through monitoring air, water, soil, and food. Surveillance, enforcement and education are accomplished by State registered sanitarians in the areas of milk, food, recreational health, water supplies, housing, rabies control, liquid waste, land use and development, solid waste, underground storage tanks, hazardous waste, and infectious waste.

During the last 25 years, there has been a growing national commitment to protect the public's health from the effects of air pollution. Federal legislation, particularly the 1977 amendments to the Clean Air Act, have guided government agencies, industry, and the public in a cooperative effort aimed at solving the technological and social problems involved in cleaning the nation's air. The Air Pollution Control program has established clean air as a top priority. The levels of criteria

# PESTICIDES- A Public Health Approach to Toxic Exposure

by Mona Bernstein

As the largest agricultural state, California applies almost 30% of all pesticides used in the United States. Pesticides are used to kill insects, weeds, fungus, molds, and rodents in homes, industry and agriculture. Because of their chemical toxicity and extensive use, pesticides pose substantial health risks to workers and community residents. Agricultural workers are exposed to pesticide concentrate, field residues and aerial drift. Emergency response personnel may come in contact with dangerous pesticides from spills, leaks and fires. The community at large may be exposed to pesticides via drinking water contamination, food residues, drift from aerial application, and hazardous waste disposal. In 1985 in San Joaquin County alone, 82 pesticide-related illnesses were reported; 70 were related to work while 12 were non-occupational. Of the 70 occupationally-related pesticide illnesses, 54 were connected to agricultural work.

California is the only state that requires physicians to report cases of suspected pesticide illness. For this reason, California has the best statistics on the extent of the problem. However, we may only be seeing the tip of the iceberg because the majority of pesticide health problems may go unreported. Accurate diagnosis in poisoning incidents may be difficult to make due to the vague nature of symptoms and lack of information on specific chemicals involved. In addition, physicians may not be familiar with their reporting requirements. Chronic disease is even more difficult to associate with a history of pesticide exposures and would, therefore, not show up in the statistics. Farm workers may be reluctant to report poisonings due to fear of losing their jobs, or because of immigration status. Pesticide exposures to pregnant women is another concern as data on reproductive effects become known, as well as exposures to children and infants because of their increased sensitivity to chemicals.

The San Joaquin Local Health District is pleased to introduce this new publication, **PUBLIC HEALTH UPDATE**, to you. The quarterly newsletter will provide information on our programs, Federal, state and local public health news, and vital statistics for the county. Please tell us what you think, so this bulletin can best address your needs. If you would like to respond to any of the articles, or if you have further questions, please contact us at 466-6781, ext.40.

## PUBLIC HEALTH ...

pollutants, such as sulfur dioxide, carbon monoxide, ozone, nitrogen dioxide, lead, and particles like soot and dust, are monitored to identify and prevent potential health problems.

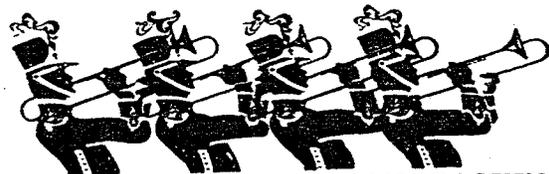

Public health addresses the health needs and treats the community as a whole, as reflected in the services of the San Joaquin Local Health District. Physicians diagnose and treat individuals on a one-to-one basis. Local health care providers and public health are partners, supporting each other and working together to achieve and maintain good health for everyone in San Joaquin County.

all of the above reasons, we may not currently be able to accurately assess the true extent of risk to the public's health. Taking a preventive approach, the San Joaquin Local Health District recently implemented a new project, the **Pesticide Education Project** to address hazards from pesticide exposures. As a large agricultural county, we recognize the need for a broad-based approach that involves the community, workers, employers and professionals.

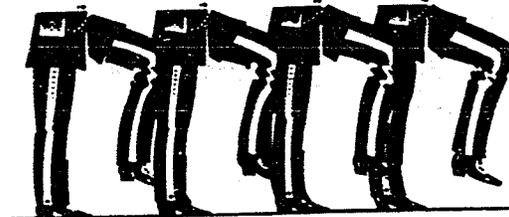

With funding from the California Department of Health Services, the **Pesticide Education Project** will provide education and training for our staff, education and training for health providers in the county, improved coordination of services among agencies, and outreach to our clients on preventive measures. Components of this project include:

- in-service staff training on health effects, prevention, and resources for referral, to be followed up with community pesticide assessment, education and outreach;
- continuing medical education workshops on specific chronic and acute diseases associated with pesticide exposures. Watch for a series of lectures in 1987;
- dissemination of information, health education materials, resources, and referrals to our clients; and
- coordination of a county-wide Pesticide Committee to enhance communication and coordination of services, identify areas of need, make recommendations to appropriate agencies, improve compliance with current regulations, and support existing preventive efforts.

We look forward to an exciting year working on this innovative approach to addressing a major community concern. Please contact Mona Bernstein, the coordinator for the **Pesticide Education Project**, at 466-6781 x40 if you have any questions or need assistance.

## OPEN HOUSE AT THE SAN JOAQUIN LOCAL HEALTH DISTRICT

TUESDAY, JANUARY 27 1987  
1:00-4:00 PM

1601 E. Hazelton Ave.

Stockton

**COMPREHENSIVE PERINATAL  
SERVICES PROGRAM: AB 3021  
THE MARGOLIN BILL**

In the fall of 1984, the governor signed into law AB 3021, known as the Margolin Bill. Currently, the regulations are working their way through the legislative process, with a target implementation date of January, 1987. AB 3021 provides for the coverage, under Medi-Cal, of comprehensive perinatal services for low-income women, from conception through one month postpartum.

In addition to medical care, program components will include nutritional, psychosocial, and health education assessments and referrals. Perinatal and parenting education classes will be available, as well as prenatal vitamin and mineral supplements.

The bill states that a comprehensive perinatal provider can be a general or family practice physician, an obstetrician-gynecologist, pediatrician, a group, any of whose members is one of the above-named physicians, or any clinic holding a valid and current Medi-Cal provider number. The comprehensive provider may contract with or employ other health care professionals- such as other physicians, physician assistants, certified nurse-midwives, nurse practitioners, registered nurses, social workers, health educators and registered dietitians, for service delivery.

Participation in the perinatal services program is voluntary for physicians and recipients of services. For more information concerning the Margolin activities in San Joaquin County, please contact:

Sue Grinnell  
AB 3021 Coordinator  
San Joaquin Local Health District  
466-6781 ext. 32

**BUCKLE UP:** *One car accident in California occurs every minute.  
Use your seat belts. It could save your life.*

Services are provided at the following San Joaquin Local Health District offices:

Stockton	1601 E. Hazelton Ave.	466-6781	M-F 8:00-11:30, 1:00-4:30

**HOLIDAY GREETINGS  
FROM THE  
SAN JOAQUIN  
LOCAL HEALTH DISTRICT**  
Please don't drink & drive!

**WELL-CHILD CARE**

The Child Health and Disability Program (CHDP) is a well-child program, providing reimbursements to public and private providers for complete health assessments for the early detection and prevention of disease and disabilities in children. A CHDP provider must be able to provide or arrange for: vision screening, hearing tests, tuberculin tests, hematocrit/hemoglobin testing, urine dipstick, and immunizations.

If you are not a CHDP provider and would like to become one, please contact the CHDP program in San Joaquin County at:

San Joaquin Local Health District  
Ernest Fujimoto, MD

Dear Mr. Peterson:

Jogi Khanna, M.D., District Health Officer, and I, as Representative for the City of Lodi and President of the Board of Trustees of the San Joaquin Local Health District would like to address the Lodi City Council. We would like to share with you the Public Health Services available to the citizens of the City of Lodi, and update the Council on the services that were provided during the past year.

We would appreciate about 15 minutes of time on your agenda at the next City Council Meeting.

Yours truly,

  
JAMES F. CULBERTSON, PRESIDENT  
Board of Trustees  
San Joaquin Local Health District
