PUBLIC WORKS DEPARTMENT

COUNCIL COMMUNICATION

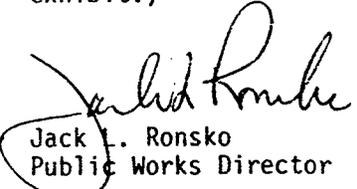

TO: City Council
FROM: City Manager
MEETING DATE: February 4, 1987
AGENDA TITLE: Approve Installation of Stop Signs at Eilers Lane and Lilac Street, and Yield Sign on Murray Street at Calaveras Street

RECOMMENDED ACTION: That the City Council adopt a resolution for the installation of multi-way stop signs at Eilers Lane and Lilac Street and yield sign on Murray Street at Calaveras Street.

BACKGROUND INFORMATION: Both of these intersections have unusual characteristics. The major approaches at Eilers Lane/Lilac Street are the southbound and eastbound approaches. The existing stop sign is located on the westbound approach (minor approach). This intersection is not a normal "T" intersection due to the volumes. There have been no accidents in 1986 and 1985. Construction of this intersection was complete in the fall of 1985 and, therefore, there are no previous accident records. Murray Street and Calaveras Street intersection has no controls and is treated similar to a "T" intersection. However, the design is more similar to a "Y" intersection. There has been one reported accident in 1986, and none in 1985 and 1984.

The intersections have not had an accident problem and they also do not meet the normal guidelines for installing yield and multi-way stop signs.

The Public Works Department has received many complaints regarding these intersections. Many drivers are confused by the unusual characteristics and do not know which approach has the right-of-way. Staff recommends installing the above controls to improve the right-of-way control. (See attached exhibit.)
