RES. AWARDDING CONTRACT FOR PORTABLE BASKETBALL FLOOR AND STANDARDS

Following recommendation of the City Manager, Council adopted the following resolution:

RESOLUTION NO. 82-20

RES. NO. 82-20

RESOLUTION AWARDDING THE CONTRACT FOR THE PORTABLE BASKETBALL FLOOR TO ROBBINS, INC. IN THE AMOUNT OF \$54,457.00 AND OUTDOOR PRODUCTS CO., FOR THE STANDARDS IN THE AMOUNT OF \$9,646.00.

M E M O R A N D U M

TO: Henry Graves, Jr., City Manager
FROM: Ed DeBenedetti, Director, Recreation & Parks
DATE: February 23, 1982
RE: Council Communication - Basketball Floor

Attached please find the bid results for the portable basketball floor.

Budgeted	\$78,000.00
Present cost based on our recommendation:	<u>64,103.00</u>
Balance	\$13,897.00

This should be a basis for jubilation, but we still need volleyball standards, additional basketball standards, and floor covering. These items should be taken care of:

Estimated	\$ 8,000.00
	<hr/>
Balance	\$ 5,897.00

OUTDOOR PRODUCTS		No Bid	No Bid	\$ 9,100. Tax <u>546.</u> Total \$ 9,646.

For the reasons listed in the attached letter, I would like to recommend ROBBINS COMPANY as the successful bidder, with Alternate #2 Floor.

We now are using their floor, Alternate #2, and have been using it for ten years with no problems whatsoever. We therefore know what they recommend is true. The reason for having Alternate #1 was so that others could bid since Robbins is the only company that makes both floors.

Regardless, the Department would be happy with either.

We recommend Outdoor Products as the successful bidder on standards since they are low and are a very reputable company, which provides good products and stands behind their products.

Dear Sir:

Enclosed is our bid for your portable basketball floor.

You will note that we have bid on your base specifications, as well as an alternate for our superior "All Star" design. The basic difference between the two systems is that the "Fair Play" floor is a two-layer construction of maple flooring over 2 x 3 sleepers. The "All Star" design is a three-layer construction utilizing a 1/2" thick plywood subfloor between the maple floor and the 2 x 3 sleepers. This three-layer design is advantageous from the standpoint of providing longer life with less maintenance and less problems due to dead spots than any other system available. The plywood greatly increases the strength of the panel to withstand repeated placement and removal. Furthermore, the plywood totally supports the maple flooring throughout the playing area so that at no time does the maple flooring itself absorb all the impact and pounding. The cross veneers of the plywood will keep the panels true and square even after years of service. And finally, the plywood provides a tongue and groove system which is clad in metal so that the panels will slide together with a metal-to-metal contact which will not wear away and which cannot be easily chipped or broken.

For these reasons our "All Star" floor is purchased about 90% of the time even at its higher cost.

The life expectancy of an "All Star" floor over a two-layer design is double. Furthermore, the life cycle costs for maintenance and repairs will be lower on the "All Star" construction. We would be glad to demonstrate to you the advantages of this system in person if you so desire.

Our "Fair Play" design, which meets your specifications completely, is equal to any other floor design (except the "All Star") that is available. It has the advantages of a concealed locking system (as opposed to a panel with the locks on the surface), and also is a square edged panel which makes it quick and easy to install.

If your budget precludes the purchase of our "All Star" floor, then we are sure the "Fair Play" floor will more than meet your criteria for a portable basketball floor. Thank you for this opportunity to bid on your project.

Sincerely,

ROBBINS, INC.
