

CITY COUNCIL MEETING

APRIL 6, 1983

COMMENTS BY CITY
COUNCIL MEMBERS

Mayor Pro Tempore Murphy asked if emergency plans including evacuation routes have been established in case of flooding in Lodi and the surrounding area.

City Manager Graves said that he and his staff had just recently met with representatives of the East Bay Municipal Utility District to discuss the Mokelumne River spring runoff. City Manager Graves gave a brief report to the Council on this meeting.

MEMO TO: A. B. Bonner, Manager of Water Operations Department
F R O M: T. J. Linville, Manager of Water Production Division
S U B J E C T: Meeting with City of Lodi

On March 28, 1983, T. J. Linville and D. A. Wilson met with Mr. Henry Graves, Lodi City Manager, and his staff to discuss the Mokelumne River spring runoff. The meeting was requested by Mr. Graves to assist his staff in preparing for possible high river flows through the City because of the predicted 1,500,000 AF of runoff.

D. A. Wilson made a brief presentation on the operation of the Mokelumne System and answered questions about remaining reservoir flood storage capacity, blowoff capacity, and estimated Camanche spill rates. The City was informed that a spill from Camanche Reservoir was possible and that the magnitude of the spill, if any, could not be accurately predicted. The City was also informed that the District would attempt to operate Camanche and Pardee Reservoirs to reduce the possibility of a spill from Camanche Reservoir.

The City also requested the District notify their fire department in event that a spill was considered eminent. The District agreed to the notification, but noted that we would not attempt to predict the spill rate. The District also agreed to run several flood routing studies to estimate the effect of different runoff condition on river flow.
