

ADJOURNED REGULAR COUNCIL MEETING
MAY 28, 1986

2

REPLACEMENT OF
DIAL-A-RIDE
VEHICLE

cc-50(A)

Council was apprised that another Dial-A-Ride vehicle had a major engine failure. It is estimated that the cost of replacing the engine will be approximately \$3,000. Staff indicated that it is not economically feasible to do this with the poor record of failures of diesel engines.

Following discussion, Council, on motion of Council Member Hinchman, Olson second, authorized the purchase of a 1986 Chevrolet station wagon for use as a Dial-A-Ride vehicle and authorized staff to prepare and submit a revised claim to COG to provide the funding for the Dial-A-Ride vehicles purchased this year.
