LETTER FROM PORT  
OF STOCKTON

CC-6

City Clerk Reimche presented a letter which had been received from Alexander Krygsman, Director of the Port of Stockton, thanking the Council for its expression of confidence and support stating that the Council's letter did much to help lift the spirit of everyone at the Port.

Mr. Krygsman further indicated in his letter that when the Port has completed their response to the Grand Jury Report, they will supply the City of Lodi with copies. They believe, according to Mr. Krygsman, that their response will clearly show that the report seriously distorted and mischaracterized the conditions and operations of the Port of Stockton.

Dear Mayor Reid:

We received your letter of August 15, 1986, expressing support for the Port of Stockton by the Lodi City Council.

When we have completed our response to the Grand Jury report, we will supply you with copies of our reply which, we think, will clearly show that the report seriously distorted and mischaracterized the conditions and operations of the Port of Stockton.

On behalf of the entire staff of the Port, I wish to thank you very much for your expression of confidence and support. Your action did much to help lift the spirit of everyone at the Port.

This last fiscal year was financially the best year the Port has experienced in its entire history. However, it takes more than money alone to maintain high morale. In fact, because the Port did so exceptionally well this last year, it was probably harder for us to understand why or how a Grand Jury or anyone would or could issue such a totally negative report. Even if Grand Jurors disapproved of some - or even if they disapproved of many of our methods, practices and ways of operating - there must have been something we were doing right to produce the highest revenue and the highest earnings ever in the Port's history.

Again, thank you very much for your public expression of support and especially for letting us know that the City of Lodi cares.

Very truly yours,

*Alexander Krygsman*
