

CITY COUNCIL MEETING
OCTOBER 14, 1987

FEDERAL AID URBAN
ROUTES APPROVED

RES. NO. 87-134
CC-7(d)
CC-45(a)

Council was apprised that the federal aid system map has not been updated since 1983. Since 1983, new areas have been annexed and additional streets have been constructed which should be included as part of the federal aid system map. Changes of existing street classifications are also needed.

The Federal Aid Urban (FAU) Route classifications include: Principal Arterial Street, Minor Arterial Street, and Collector Street. The designation and classification of the Lodi streets were based on the criteria established by the federal government. The proposed Federal Aid Urban Routes, classifications, and street miles were shown on an exhibit presented to the Council.

The difference between the classifications is not critical. FAU funds can only be used on FAU Routes and cannot be used on local streets. Therefore, there is an advantage to the City to include additional streets in the FAU routes being adopted.

It is recommended that the following streets be added and removed:

Streets Added
