

CITY COUNCIL MEETING
OCTOBER 17, 1984

CC480
(CC43) Pg 277

AGENDA ITEM
CONTINUED

Following introduction of the matter and a brief discussion, Council on motion of Council Member Reid, Olson second, continued to the Regular Council Meeting of November 7, 1984, Agenda Item K-1 - "Pacific Avenue Parking, Lodi High - Establish Bus Zone".

CITY OF LODI

PUBLIC WORKS DEPARTMENT

COUNCIL COMMUNICATION

TO: City Council
FROM: City Manager
DATE: October 11, 1984
SUBJECT: Bus Zone at Lodi High School

RECOMMENDED ACTION: That the City Council adopt a resolution establishing a bus zone on Pacific Avenue adjacent to Lodi High School as shown on the attached Exhibit A.

BACKGROUND INFORMATION: Mamie Starr, Facility Planner, Lodi Unified School District has requested the parking be eliminated and the area be made available for bus loading and unloading. (See enclosed letter)

The area of the proposed bus zone is presently marked for approximately 42 diagonal parking stalls.

The School District will reimburse the City of Lodi \$275 as the cost of removing 700 lineal feet of 4" wide parking pavement markings.

Since the high school appears to be the only property affected by the change, and has already reserved some onsite stalls for visitors and also has plans to provide additional off-street parking to compensate for the loss of the on-street parking, the Engineering Division recommends the request be approved subject to payment for removal and provision of 40 additional onsite stalls.

Subject: Parking Modifications - Lodi High School

Dear Jack:

I have received a request from the Principal at Lodi High School, Dutch Williams, and the Director of Transportation, Mr. Merle Jewett, to communicate with you regarding a change in curb color on Pacific Avenue in front of Lodi High School.

Both gentlemen are requesting that the curb be changed from parking allowed, to red, from the parking lot driveway south of the buildings to the driveway on the north side of the buildings. Most of this area is currently an inset curb. It is the school's desire to have this area available for bus loading and unloading, as it was originally designed.

Since the District's last communication with the Council and staff on the matter of traffic and parking at this site, the entire transportation facility has been moved off campus, freeing up additional parking area and the school has moved to an extended day schedule with more bussing than in past years.

It is our intention to redesign the old bus parking area to provide for additional student and faculty parking, thereby replacing and supplementing the lost on-street parking places. The required handicapped parking space will also be relocated to the north side of the campus, closer to a building entrance.

Thank you for considering our request and if deemed appropriate, placing it on the Council agenda.

The City's cooperation in dealing with the Lodi High School traffic and parking situation is very much appreciated. If there are any questions, it might be best to direct them to the principal.

Sincerely,

Mary Joan Starr, AICP
Facility Planner
