CITY COUNCIL MEETING

OCTOBER 19, 1983

SHADY ACRES  
PUMP STATION  
RECONSTRUCTION

City Manager Graves presented the following bids which had been received for "Shady Acres Pump Station Reconstruction" as follows:

*Page 43*

Council was apprised that this project includes the construction of a reinforced concrete pump structure, installation of new pumps and controls and reconstruction of a flow metering structure and headwall on the WID canal.

SHADY ACRES  
PUMP STATION  
RECONSTRUCTION  
(CONT'D)

The pump station will replace the existing two small stations which will remain in service during construction. The new station will help relieve flooding in the Cabrillo Circle and Charleston Way areas.

The Woodbridge Irrigation District approved the plans and specifications at its October 4, 1983 meeting.

# CITY OF LODI

PUBLIC WORKS DEPARTMENT

## COUNCIL COMMUNICATION

TO: City Council

Project Data

FROM: City Manager

Approved in F.Y. Budget: 1982/83

DATE: October 13, 1983

Fund: Federal Revenue Sharing

Amount Budgeted: \$342,000

Bid Opening Date: October 12, 1983

SUBJECT: "Shady Acres Pump Station  
Reconstruction"

RECOMMENDED ACTION: That the City Council award the contract for the above project to R. Goold & Son in the amount of \$248,692.00.

BACKGROUND INFORMATION: This project includes the construction of a reinforced concrete pump structure, installation of new pumps and controls and construction of a flow metering structure and headwall on the WID Canal. The pump station will replace the existing two small stations which will remain in service during construction. The new station will help relieve flooding in the Cabrillo Circle and Charleston Way areas.

The Woodbridge Irrigation District approved the plans and specifications at its October 4, 1983 meeting. Modification of the existing Agreement will come before the City Council hopefully in November as a separate item.

Plans and specifications for this project were approved on September 21, 1983.

The City has received the following 7 bids for this project:

<u>BIDDER</u>	<u>LOCATION</u>	<u>BID</u>
R. Goold & Son	Stockton	\$ 248,692.00
Claude C. Wood Company	Lodi	\$ 306,930.00
Monterey Peninsula Engineering, Inc.	Monterey	\$ 310,633.00
Howk Well & Equipment Co., Inc.	Modesto	\$ 315,430.00
Kawah Construction Company	Visalia	\$ 323,240.00
Wayne Fregien	Stockton	\$ 335,564.00
Granite Construction Company	Watsonville	\$ 386,847.00
Engineer's Estimate		\$ 197,000.00

Although the bids are above the Engineer's estimate, it is recommended the project be awarded. In reviewing the estimate, it appears not enough allowance was made for the cramped working conditions and time of year (winter) during which the construction must take place.

APPROVED:

FILE NO.

HENRY A. GLAVES, City Manager

C-1-d

City Council  
October 13, 1983  
Page 2

A tabulation of the bids is attached.

The low bid was reviewed with the Contractor and he is satisfied with his price. We have also checked with the City of Stockton where R. Gould & Son has done other pump stations and they indicated he does good work.

Attention: Bill Needham

Gentlemen:

SUBJECT: Shady Acres Pump Station ✓

The City Manager has asked us to review and comment on your letter of November 3, 1983 regarding two submersible pumps for the Shady Acres Pump Station project.

We do have a fairly restrictive specification - we want high quality equipment; but more importantly, we want equipment that can be readily serviced and locally supported.

We asked the Contractor about all the materials and subcontractors to be used on the project, as we do any project of this nature. He indicated that his low bid on the submersible pumps was from PACO, not DAVIS/EMU. However, all the manufacturer's prices were fairly close, and he had no strong preference as to what to furnish. We indicated that we had not worked with the PACO equipment and would have to carefully review the submittal.

We told him that previous pump station projects utilized Flygt pumps, and we were happy with those. We told him that we had reviewed a DAVIS/EMU submittal on a previous project and while the pump met the specifications, the manufacturer's support services did not. We also indicated that that was over a year ago and the situation may have changed. We reiterated that we would give any submittal serious consideration.

Recently the Contractor told us verbally that he will be submitting Flygt pumps since the total cost differential was very small. He said if we had had no preference whatsoever, he would have submitted PACO and that he would ordinarily submit whatever an agency preferred if the price difference was not substantial.

*We have approx 10 Flygt pumps in the system now  
Almost all our submersibles are Flygt*

Water and Wastewater Equipment

November 9, 1983

Page 2

To date we have not received a submittal on the submersible pumps.

Please feel free to call us at your convenience if you have any questions concerning these comments.

Sincerely

Jack V. Ronsko
