PUBLIC
SAFETY
BUILDING

Mr. Marion J. Varner, Architect for the Public Safety Building, introduced Mr. Robert M. Snyder and Associates, the mechanical engineers for the Safety Building. Mr. Varner said he would present the architectural and structural portions of the plan and that Mr. Snyder and his associates would explain and answer questions on the mechanical phases of the building. Mr. Varner explained the Federal labor requirements which would have to be followed by the contractors because of the civil defense portion of the building, and discussed with the Council various parts of the plans and specifications. Mr. Snyder and his associates reviewed the plans for the mechanical equipment, covering air conditioning, plumbing and electrical. Mr. Varner said that bids could be called for in December, but that final approval of the civil defense plans would not be ready before the middle of January so award could not be made until that time. Councilman Dow moved that the plans and specifications for the public safety building be approved and that call for bids be made as soon as the wage scale required from the Federal Government was received. His motion was seconded by Councilman Walton and carried unanimously. Mr. Varner stated that according to his contract, he was to furnish five sets of the plans and specifications, but the City was to pay for the rest. He anticipated that 35 to 40 sets would be needed. Councilman Culbertson moved that the additional sets be made at Mr. Varner's office at the City's expense. His motion was seconded by Councilman Walton and carried.

ROBERT
McLANE

Mayor Kirsten expressed his regrets over the death of Superintendent of Utilities Robert McLane and said he would write a letter to Mrs. McLane with his condolences; the other members of the Council stated they wished to add their expressions of sympathy also.
