

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Conduct Public Hearing to consider the Planning Commission's recommendation that the City Council adopt a General Plan Amendment and Rezone for 1549 & 1611 W. Kettleman Lane (Sasaki Property). The requested General Plan Amendment is to modify an existing "O" (Office) land use boundary, and the requested change in zoning is from RCP, Residential Commercial Professional and R-2, Residential Single-Family to PD(33), Planned Development.

MEETING DATE: August 4, 1999

PREPARED BY: Community Development Director

RECOMMENDED ACTION: That the City Council approve the Planning Commission's recommendation to adopt a Rezone and General Plan Amendment for the above stated properties.

BACKGROUND INFORMATION: This is a request for a Rezone and General Plan Amendment on two properties located at 1549 & 1611 West Kettleman Lane. The two properties total approximately 23 acres. The southern 500 feet of the two properties is currently zoned R-C-P, Residential Commercial Professional and the remainder of the property northward to the Woodbridge Irrigation District (WID) canal is zoned R-2, Residential Single-Family. The properties make up the Sasaki Property Subdivision, which includes a 99-lot medium-density, small lot, single-family subdivision on the southern 13.2 acres adjacent to Kettleman Lane, and a 55-lot low-density single-family subdivision with 5 corner duplex lots on the northern 9.5 acres. The properties are generally north of Kettleman Lane, south and west of the canal, and east of 1723 West Kettleman Lane.

In December of 1998, the City Council approved the recommendation of the Planning Commission to establish the development plan for the Sasaki Property. The medium-density, small lot, single-family subdivision is plotted at 7.5 units per acre with an average lot size of around 3,000 square-feet. The 7.5 unit per acre density is only slightly higher than the low-density maximum of 7.0 units per acre, but below the maximum allowed in the RCP zone. The medium-density subdivision is designed to front on private streets, and includes a small private community building, park and swimming pool.

The low-density, single-family residential portion of the development plan will develop within the requirements of its R-2, Single-Family Residential zoning. The area will be developed at 6.3 units per acre with an average lot size of around 5,250 square-feet. Each of its five corner lots will develop as duplexes. The streets in this area are proposed to incorporate the City's recommended parkway standard, which incorporates 4-foot sidewalks behind 6-feet of parkway all within a 52-foot right-of-way. The medium and low-density subdivisions have been designed to develop separately from one another, neither being dependent upon the other.

The existing zoning for the medium-density project area is both R-C-P, Residential Commercial Professional, and R-2, single-family residential. The R-C-P zoning is inconsistent with the medium density project's design, as well as the R-2 zoning for both design and density. The 55 low-density lots are entirely within the project area zoned R-2, which is the proper zoning. As part of the development

plan and subsequent tentative subdivision map approval for the medium density portion of the project, a condition was made to change the zoning to PD, and to perform a General Plan Amendment to adjust the existing O, Office boundary to encompass the northernmost portion of the medium-density project area. The O, Office designation is consistent with the medium-density project, which is why the boundary is being adjusted and the designation is not being changed.

The PD zoning is necessary because the homes within the medium-density portion of the development plan are proposed to develop with unconventional design standards. For example, the properties are zero lot line with a bend in the middle. This "Z"-lot design allows for the fronts of the homes to be placed at an angle relative to the street to visually break up a row of garages fronting the street. The properties will also have front yard setbacks of 12-feet and 16-feet opposed to the standard 20-feet. Finally, the properties will front on private streets with designated parking areas clustered on each street and at the community center, park, and pool.

The homes are plotted so that each has a single 10-foot side yard, and so that the driveways of homes are paired on a single property line to increase the distance between driveways and increase area for on-street parking. Pairing and staggering of the driveways is intended to allow sufficient room for emergency vehicle access.

Given the current development trend emphasizing the construction of single-family homes, staff sees the medium density portion of this subdivision and the duplexes as a benefit to the City. These elements of the subdivision will not only provide the City with a small measure of more affordable housing, but will also keep the City in pace with the General Plan and Growth Management Ordinance requiring 10 percent medium-density housing. The City's previous approval of the Sasaki Property Development Plan has prompted the applicant to follow through with the requests at hand.

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Public Hearing to adopt the Uniform Codes as approved by the State of California

MEETING DATE: August 18, 1999

PREPARED BY: Community Development Director

RECOMMENDED ACTION: That the City Council conduct a Public Hearing to adopt the following Uniform Codes as approved by the State of California:

1. Uniform Building Code – 1997
2. Uniform Plumbing Code – 1997
3. Uniform Mechanical Code – 1997
4. Uniform Housing Code – 1997
5. Uniform Code for the Abatement of Dangerous Buildings – 1997
6. National Electrical Code - 1996

BACKGROUND INFORMATION: Uniform Codes for construction are published every three years. The State of California adopts these Codes by reference and requires Cities and Counties to adopt the same within six months. This process assures uniformity between jurisdictions throughout the State.

The Uniform Codes are dedicated to the development of minimum standards, which protect property and human life. The Uniform Building Code guarantees to the purchaser of a property that the structure is constructed adequately to resist earthquake, wind, rain and fire, and will maintain its property value if properly maintained. The Uniform Plumbing, Mechanical and National Electrical Codes provide for sanitation, comfort, convenience and life safety in their respective fields. The Uniform Housing Code provides minimum standards for human habitation and the Uniform Code for the Abatement of Dangerous Buildings allows the City to deal with unsafe buildings by either repair or demolition.

In addition to the Uniform Codes, the Building Division is also charged with the enforcement of the State handicap and energy regulations.

Changes to the Codes are processed each year and published every three years in a form permitting ready adoption by local communities. Anyone may propose changes to the codes. These changes are carefully reviewed by code committees and are to become part of the code. These meetings allow the free exchange of views leading to changes, which are responsive to the concerns of the construction industry, design professionals and building officials.

As the Council will recall, staff presented an overview of the codes at a shirtsleeve meeting. It was requested that we make ourselves available to local developers for a review of the changes proposed. We have made contact with a number of the companies doing business in the City as well as the Building Industry Association. While no one has taken us up on our offer, we will continue to provide that service as requested.

FUNDING: None required.
