CITY OF LODI  
ELECTRIC UTILITY DEPARTMENT

6.
  - a. Mobile home parks for which submetering was permitted prior to March 31, 1989, and for which electric service is included in the facilities furnished to their tenants, may employ metering equipment as a means of retroactively adjusting rental charges for energy consumption, provided that the portion of such charges allocable to electricity may not exceed the rates the City would charge if it served the tenants directly.
  - b. Expansion of submetering systems in service as of March 31, 1989 will only be permitted in the case of minor rearrangement of pads within an existing mobile home park. Development of land even though contiguous to an existing mobile home park shall not qualify for expansion of an existing submetering system. The City will serve each such pad directly at the park operator's/owner's expense.

E. Master Meters and Submetering Systems

Master meters and submetering systems are not permitted except for those in service as of March 31, 1989 and by exception "D5" above.

F. Testing of Submeters

As a condition of service for submetering, where electric energy is furnished in accordance with "D6" above, customers using submeters as a basis for charges for electricity shall submit to the City certification by a meter testing laboratory, satisfactory to the City, as to the accuracy of the submeters upon request of the City. As a further condition of service for submetering, the customer shall agree that he/she will be governed by the City's Rule No 18, Meter Tests and Adjustment of Bills for Meter Error. As a further condition of service for submetering, the customer shall agree that the City may inspect and examine customer's billing procedures from time to time to determine that such service is made in accordance with this rule.
